

About Me

I'm a full stack web developer with a passion for building awesome web applications that solve problems people didn't realize they had. I write clean, reusable code with a focus on keeping applications and sites secure. When I'm not writing code, I love to work on renovating my 1800s-era home, discover new places and film with quadcopters.

What I Know Best

PHP, JavaScript, Node.js, VueJS, MySQL, InfluxDB, Wordpress, Laravel, HTML5, CSS, SASS, Foundation, git, REST, Python, Ansible
APIs: Stripe, Slack, VMware, Jira, Postmark, Twilio, Google Maps, Hubspot, Facebook, Twitter, YouTube

Education

Rochester Institute of Technology - Rochester, NY September, 2004 - February, 2009
Bachelor of Science in Information Technology with concentrations in Web Application Development & Information Security

Experience

Covenant Eyes Inc - Web Applications Developer III July, 2017 - Present
I was responsible for the architecture, development and maintenance of several enterprise web applications and microservices that support both Covenant Eyes' customers as well as internal use by other staff members. I was also tasked with training new developers and reviewing their code to ensure the quality of their work. I was also asked to be a member of our high-quality engineering team that ensures our organization is constantly on the cutting edge of development languages and patterns.
Supervised by Shawn Pillsbury, Alan Ray and Dave Caswell (989) 720-8000

Wilson Logistics - Web Application Developer December, 2016 - June, 2017
I captured film for, designed and developed responsive websites for JimPalmerTrucking.com, Wil-Trans.com and WilsonLogistics.com. I designed and developed a web application on WilsonLogistics.com that tied into the FMCSA carrier data API. I also devised and implemented a framework that allows tracking the original source of a driver application all the way through the hiring process, and developed custom reports to analyze the performance of each traffic source, ad campaign or referral site over time.
Supervised by Kameron Wilson (406) 829-6216 and Michael Ensminger (417) 447-0381

Track 5 Media, LLC - Lead Web Application Developer January, 2014 - March, 2017
I built a cutting-edge job board framework that powers AllTruckJobs.com, TravelNurseSource.com, AlliedTravelCareers.com and AllPhysicianJobs.com. I also architected and maintained a high-traffic load balanced server environment. I was responsible for mentoring and managing a team of 3 developers, working closely with our project manager to ensure new features and bug fixes were implemented as efficiently as possible. In December 2016, I transitioned to working remotely as a freelancer for Track 5 Media until March 2017.
Supervised by Oliver Feakins (877) 696-7482 ext. 101

Marriner Marketing Communications Inc. - Senior Web Developer March, 2009 - January, 2014
I developed and maintained websites and web-based applications for clients primarily in the foodservice industry using a variety of web technologies. I built custom themes and plugins for Wordpress sites as well as custom PHP, ASP, and ASP.NET C# sites. I designed and implemented MySQL & MSSQL databases for use with web applications. I implemented mobile and social marketing strategies to help our clients embrace ever-changing technologies.
Worked closely with Trey Buckingham (410) 715-1500 ext. 149
